

A hand is shown holding a small globe of the Earth. The globe is centered on the Atlantic Ocean, showing parts of North and South America. The background is a dark blue gradient with a large, faint compass rose. The compass rose has eight points, each with a decorative, ornate symbol. Lines connect these symbols to the center of the globe. The overall image has a professional, global feel.

ACM Global Central Lab Capabilities:

High-Impact Global Project Teams

Global Access to Lab Data

ACM LabStarSM online reporting tool with results in real time

Data Your Way

ASCII, SAS, HL7, CDISC

Global Logistics

Experts in the nuances of shipping of kits or specimens anywhere, anytime, to any corner of the world

Global Quality Controls

Standardized instrumentation and testing methodologies

Global Reference Ranges

Presented in conventional and/or SI units

Global Bio-storage

Store precious specimens in whatever conditions are required, anywhere in the world

Site Support

Full staff of Research Associates to support site needs 24/7

Credentials

CAP, CLIA, NYS, NGSP level 1, SAMSHA

ACM Global Central Lab makes use of local knowledge combined with global coordination for optimum results.

Flexible in our Approach, Precise in our Delivery

ACM Global Central Lab is a global force in central laboratory testing. It is our flexible approach, attention to detail and high-quality customer service that sets us apart from the competition.

With a staff of 400 laboratory experts, ACM is able to offer a broad and customized menu of safety and specialty tests for clinical trials. Our analytical team performs 13 million tests each year, featuring more than 1,500 individual tests spanning all medical disciplines, including pathology, microbiology, flow cytometry and pharmacogenomics.

Our Focus on Central Lab Services

Our single focus on central lab services enables us to efficiently manage the nuances of lab testing for global clinical trials – from specimen handling and logistics to a harmonized database and reporting to cultural and regulatory issues within each country. We partner with your team to keep your trial on schedule.

Our Experts

We attract highly experienced and credentialed scientists and project management staff to handle your trial needs. Our consultative approach helps uncover time and cost efficiencies, as well as the most appropriate testing methods, to best achieve your study objectives.

The Right Size for Your Needs

We pride ourselves on our high-impact clinical trials teams that are adept at managing complex trials. We are big enough to handle the largest global trials, yet small enough to be agile – reacting instantly to the dynamics of clinical research.

Tried and True

We have successfully provided central lab services to hundreds of clients and thousands of sites in almost every phase and therapeutic area in clinical research.

Put Us to the Test.

Global Reach with a Personal Touch

With global locations, our operations extend to more than 60 countries... we can support your needs in just about every corner of the globe.

We have implemented fully standardized and validated systems to handle your global trials in a seamless fashion. With the hands-on approach of our Global Project Managers, each study is carefully set-up and managed to the specifications of the client.

Clinical Trials Services

We offer a broad menu of services so you can determine how and when you receive your study results. We adapt our services to the unique needs of your study, offering customized materials, method development, procedures, reporting and data delivery options that meet our validation standards prior to the start of your study.

Our dedicated project management team provides transparency and clarity throughout our process so you are assured of the accuracy and timeliness of the data. We work seamlessly with your team by anticipating your needs and responding quickly to your requests. We focus on what you need to run a successful study.

The success of studies is largely based on the quality of our communications. That's why we conduct regular satisfaction surveys with our customers and investigators, and take great pride in the fact that 99% of clients surveyed say they are very satisfied and would recommend ACM.

Analytical Capabilities – Under One Roof

Our extensive offerings allow us to keep most of your testing in house... as a matter of fact, we only send out highly esoteric testing, which is less than 1% of our business.

ACM's laboratory facilities are equipped with state-of-the-art technology to ensure that we deliver precise, accurate data in a time-efficient manner.

The laboratories offer a full range of testing services in an extensive range of disciplines, including:

- Allergy testing
- Anatomic pathology
- Clinical chemistry
- Coagulation
- Endocrinology
- Flow cytometry
- Hematology
- Immunology
- Microbiology
- Pharmacogenomics
- Serology/Virology

Better Treatments to Enrich Peoples' Lives

Our mission is to deliver the highest quality laboratory science and clinical research services that ultimately provide better treatments to enrich peoples' lives.

Environmentally Conscious

We are also committed to implementing environmentally-friendly and sustainable practices at our facilities. From using lab collection kits assembled from using 100% wind energy, to reduced and recycled paper usage to energy conservation, ACM Global Central Lab uses green solutions to minimize waste and increase efficiencies.
